# Assembly

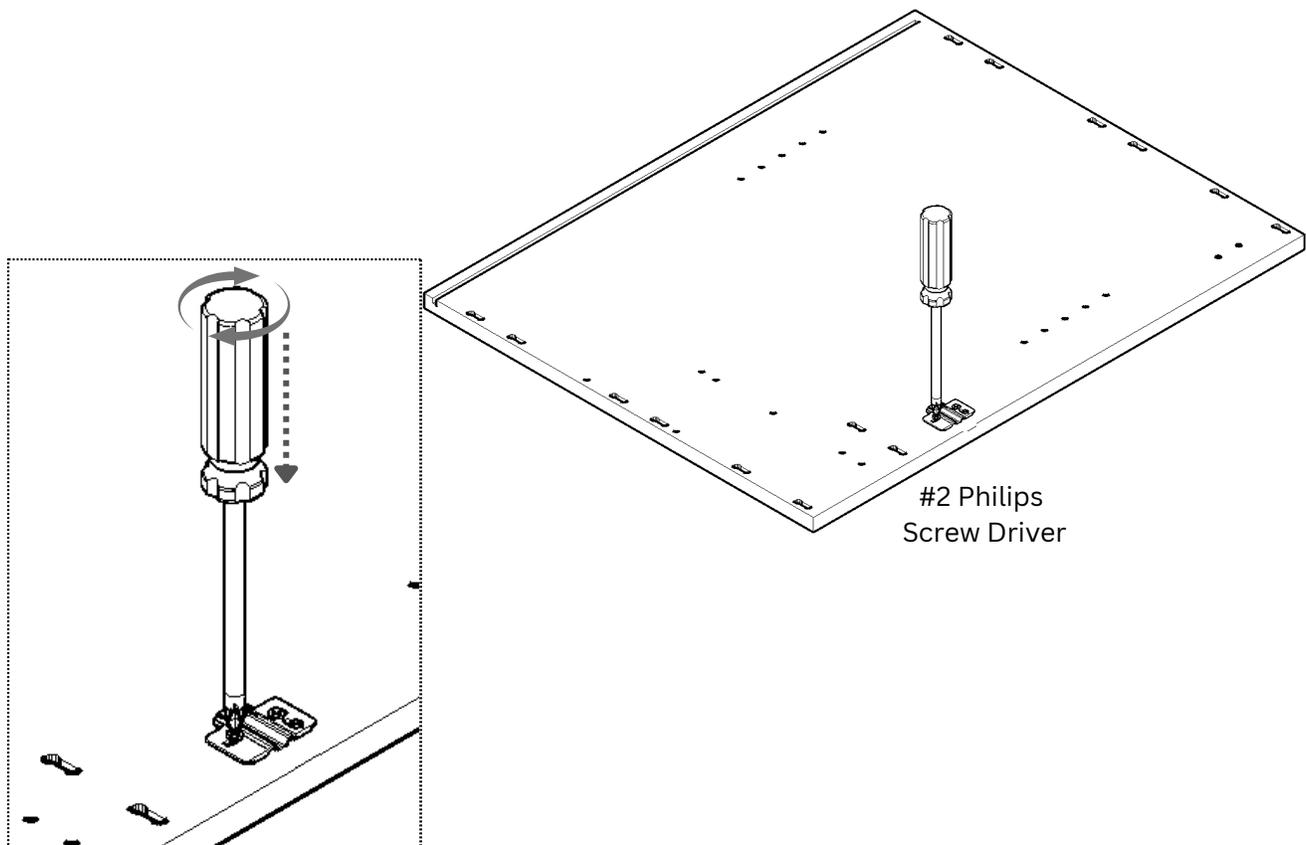

## Step 1

### Installation - Side Panel (Gable)

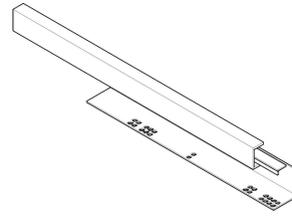

Lay the side panel on a soft surfaces on the ground.

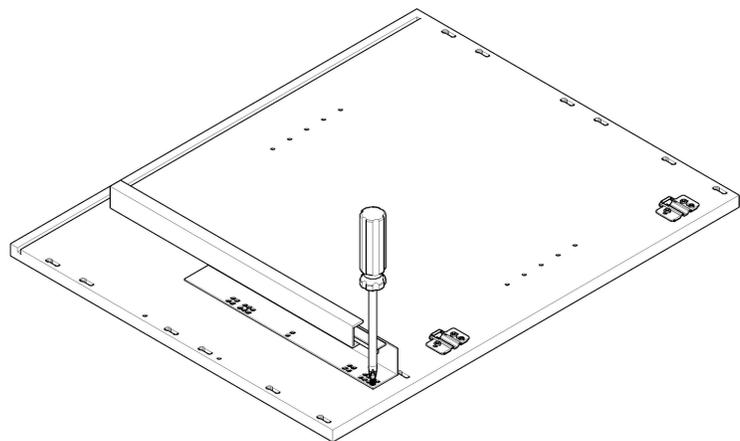

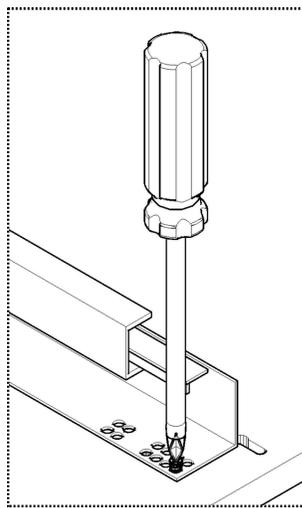

The screws are on, but you need to tighten them.

Take out the drawer glide and place it with the screw-hole side facing down

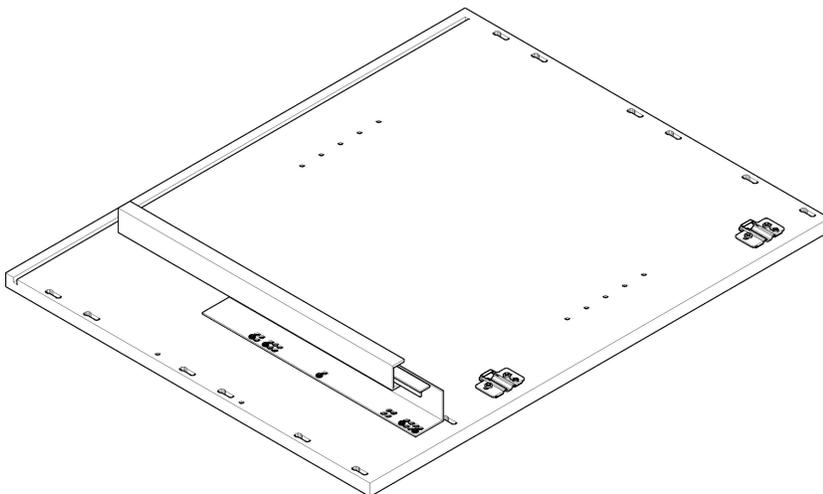

Take 4 guide screws and you need to tighten them.

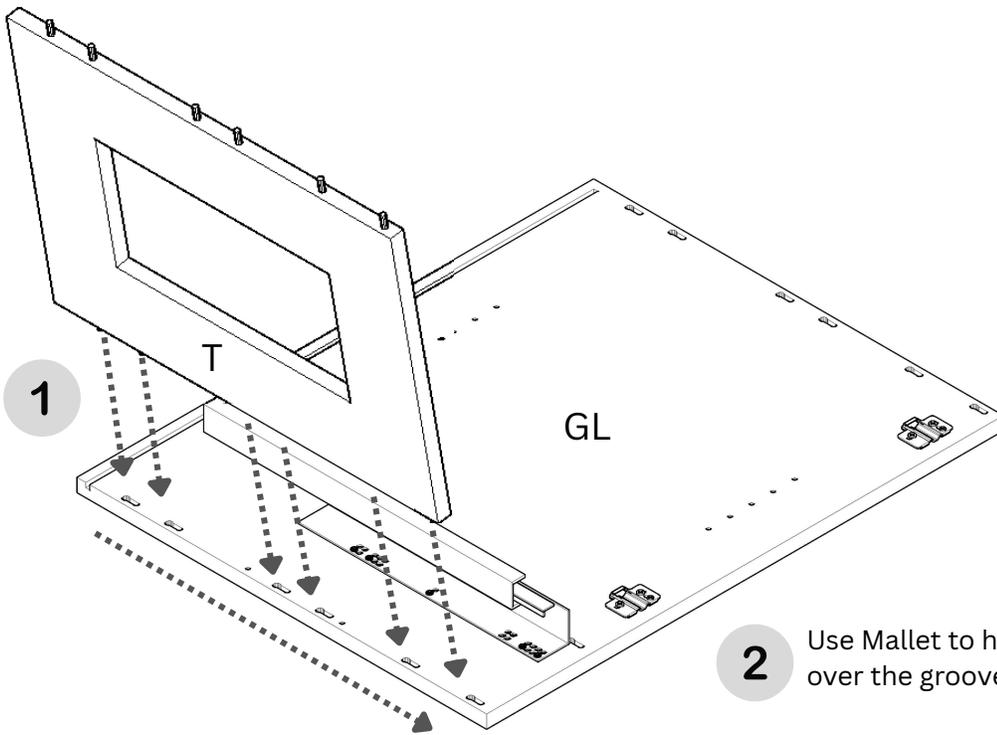

**To achieve:**

Place the hinge plate and one side of the drawer glide on the left panel.

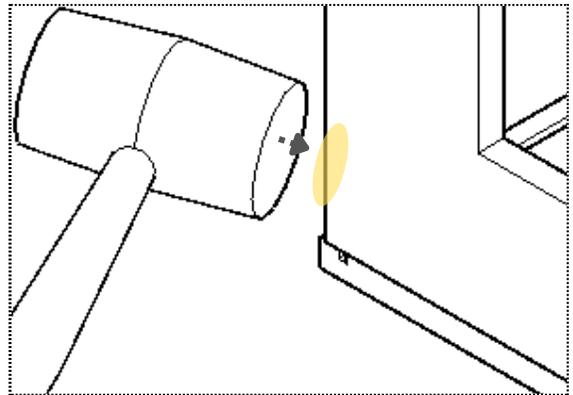

## Step 2

### Installation - Top Panel

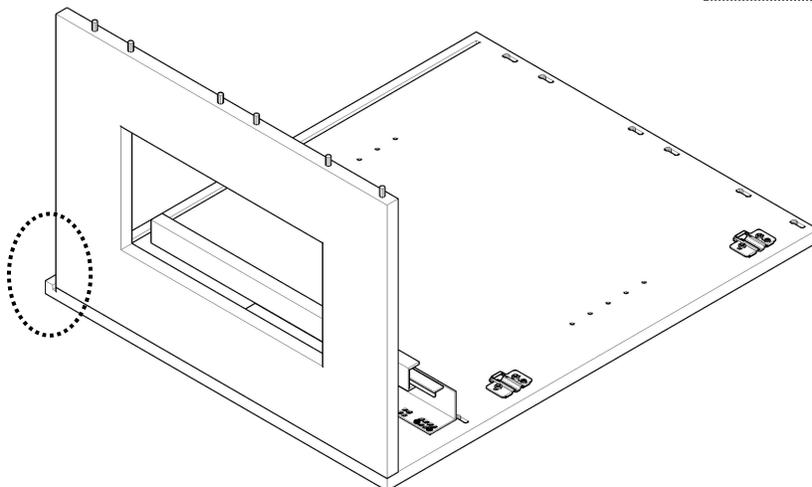

2 Use Mallet to hit the top panel all the way over the groove

#### To achieve:

The side of top panel is beyond the groove.

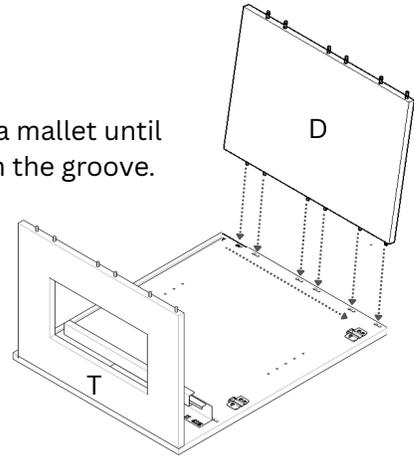

### Step 3

## Installation - Deck (Bottom) and Drawer Stretcher

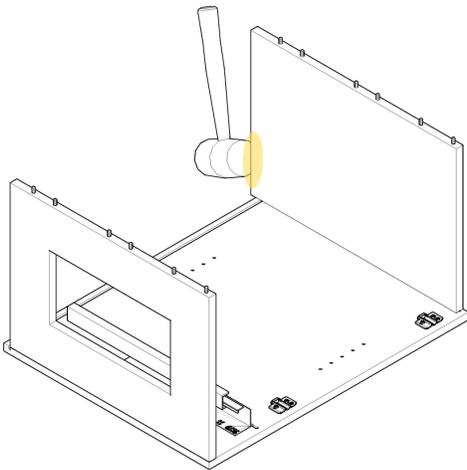

1

Tap the deck with a mallet until it is fully seated on the groove.

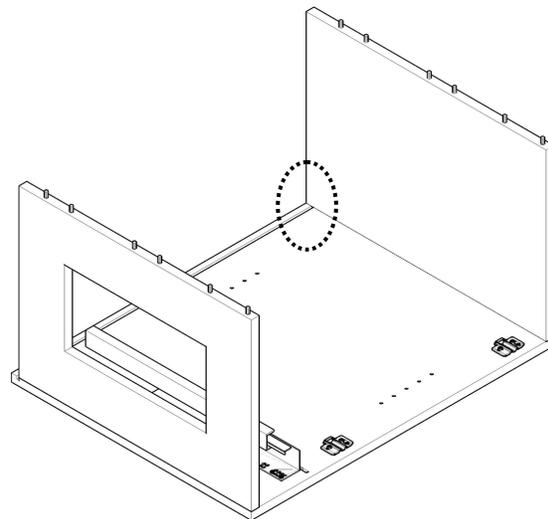

2

Align the deck(D) with the side gable(GL).

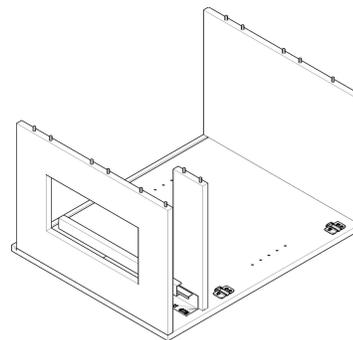

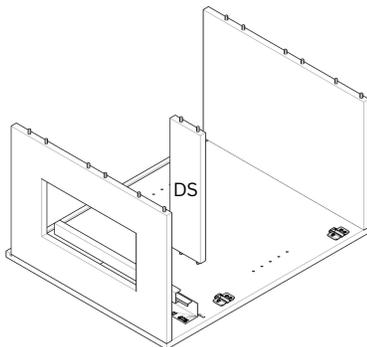

**To achieve:**

The Deck is on the groove.

1

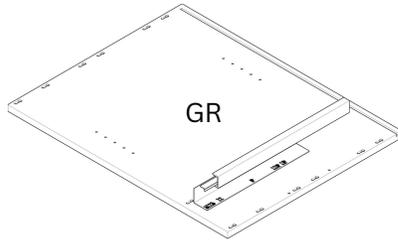

Place Drawer Stretcher into the peanut hole on left side panel.

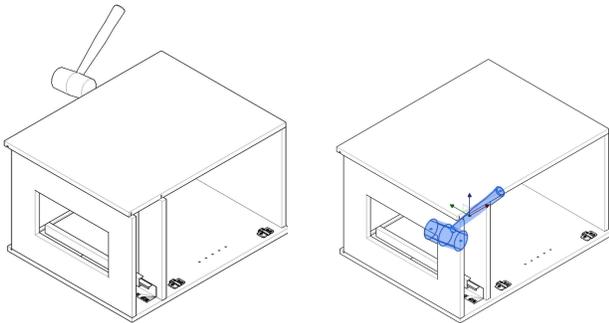

## Step 4

### Installation - Other Side Panel

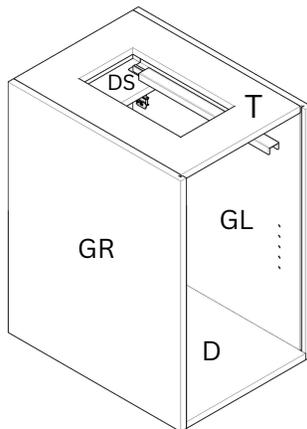

- 1 Lay the right side panel on a soft surface on the floor, and install the drawer glide as you did on the other side.

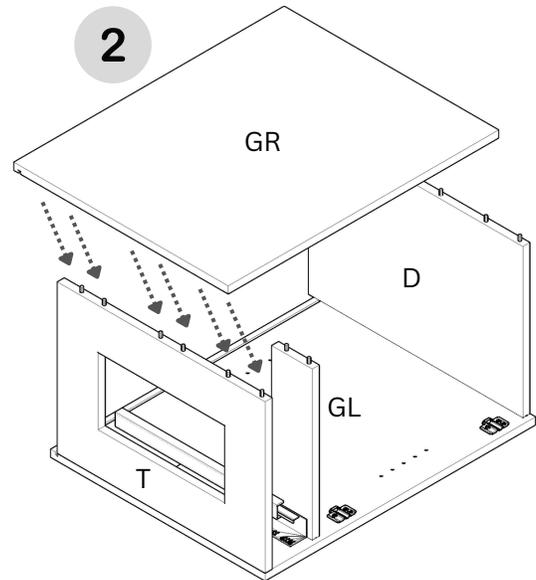

- 3 Gently tap the right gable, deck (GR) and drawer stretcher, alternating among them.

- 4 Lift the box and set the top panel on top, with the grooved side facing you.

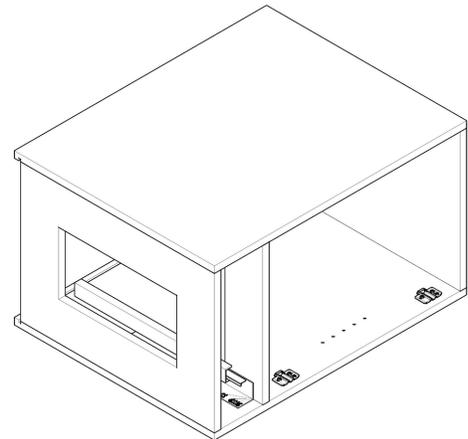

2

#### To achieve:

Align the bottom, right gable, and drawer stretcher so they are flush with the front of the cabinet.

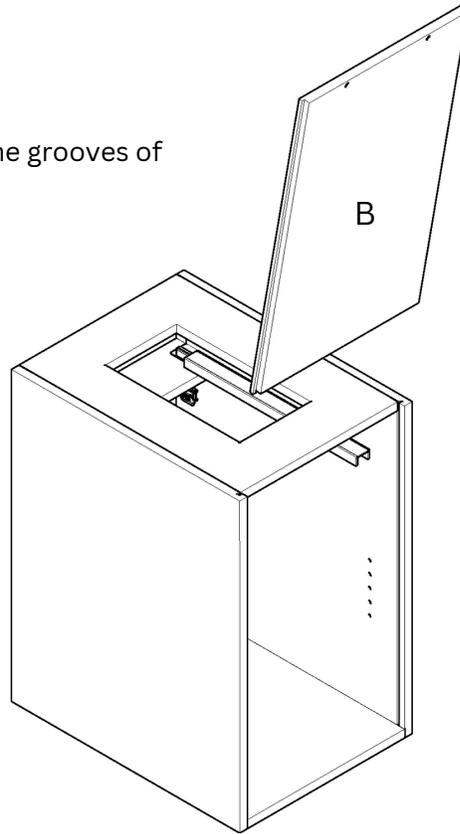

## Step 5

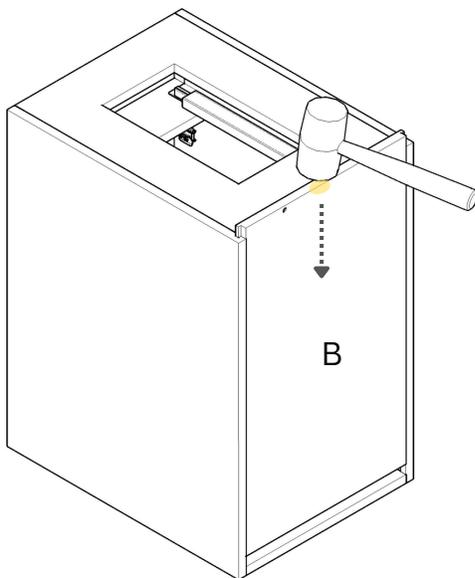

### Installation - Back

1

Slide the back panel into the grooves of both side gables.

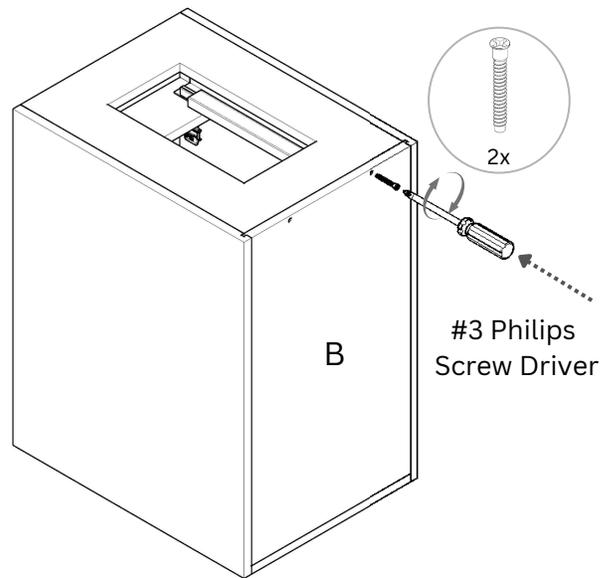

2

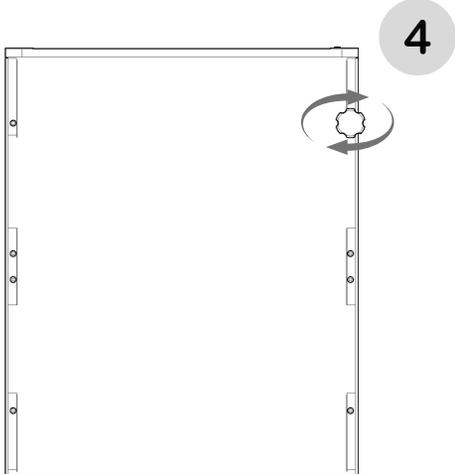

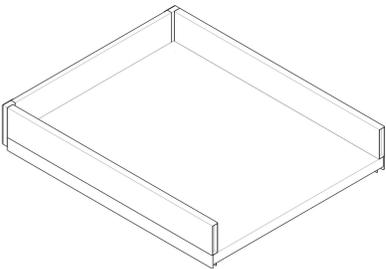

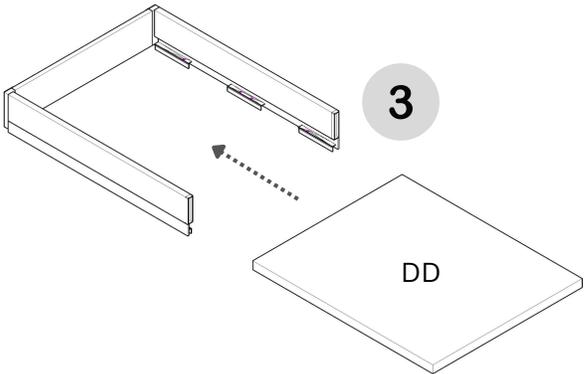

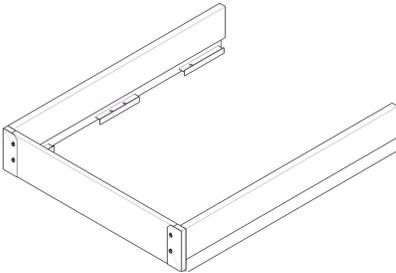

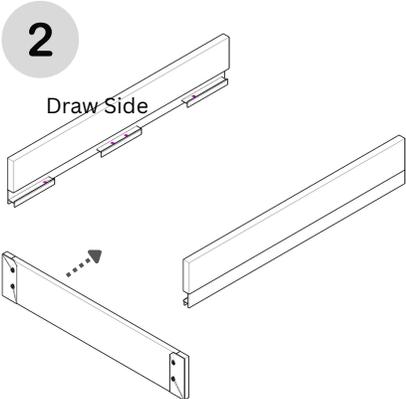

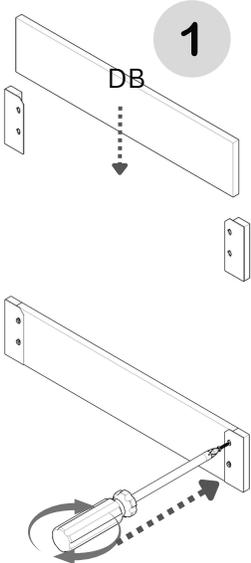

3

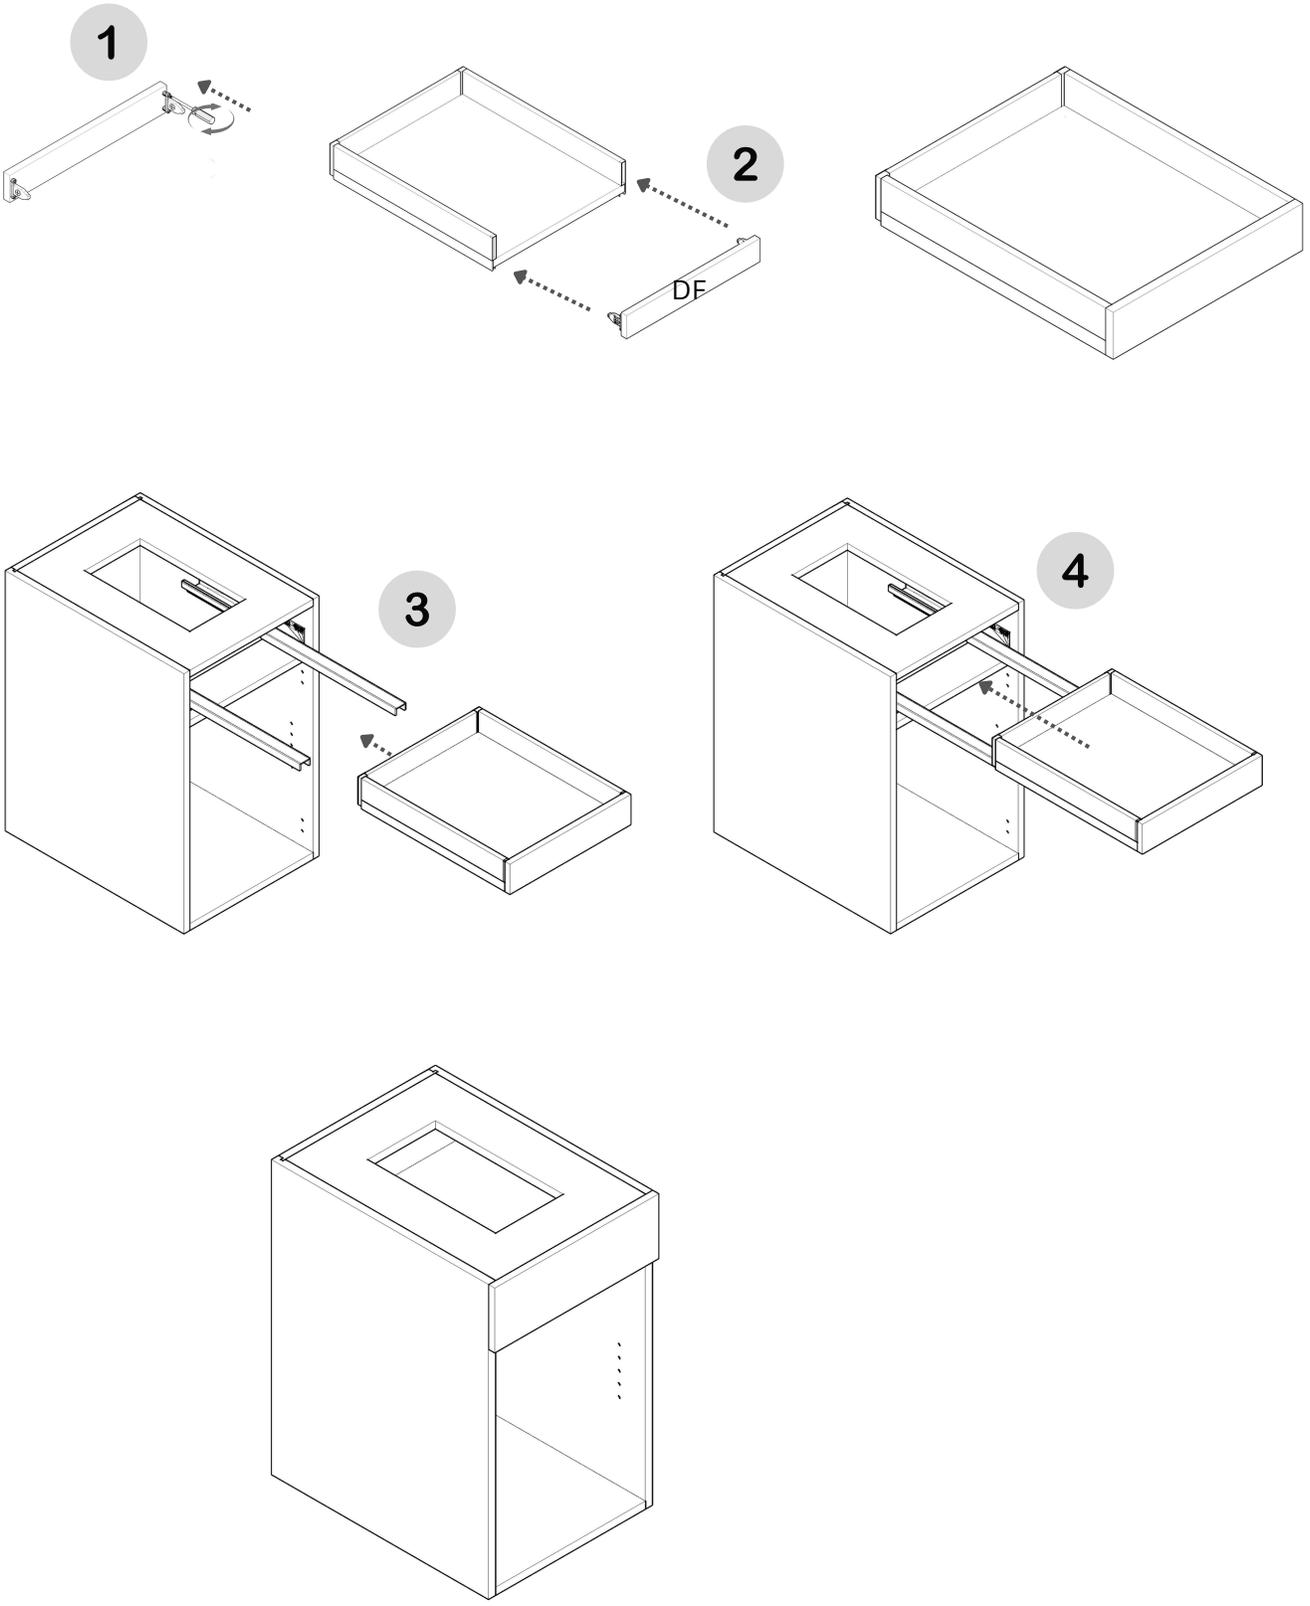

Screw the two confirmat screws into the holes on the back panel.

# Step 6

## Installation - Drawer

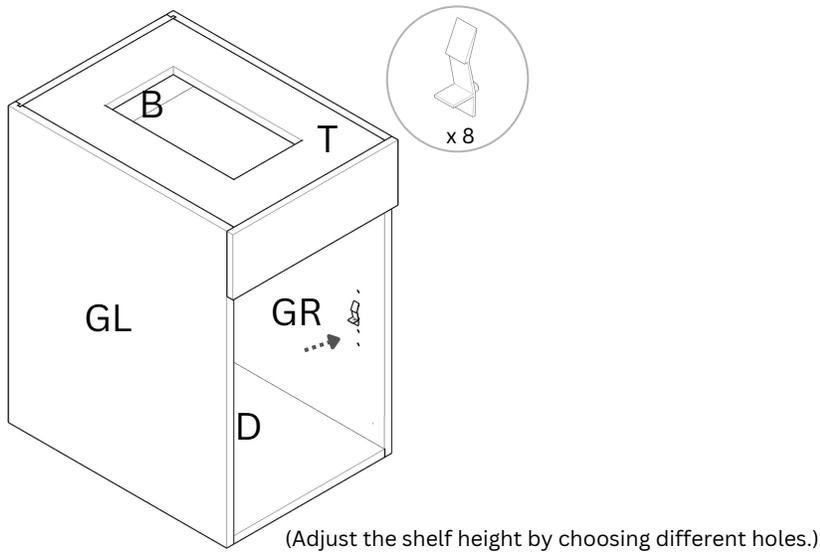

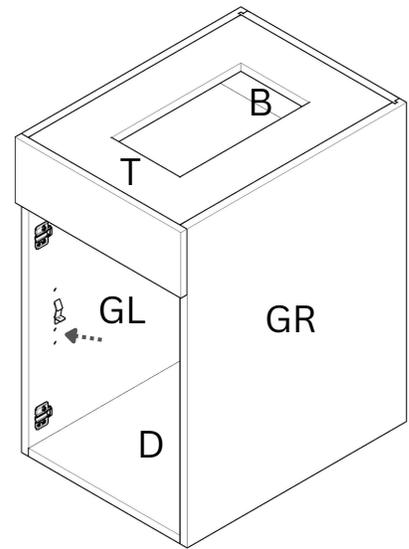

## Step 7

### Installation - Shelf Clip and Shelves

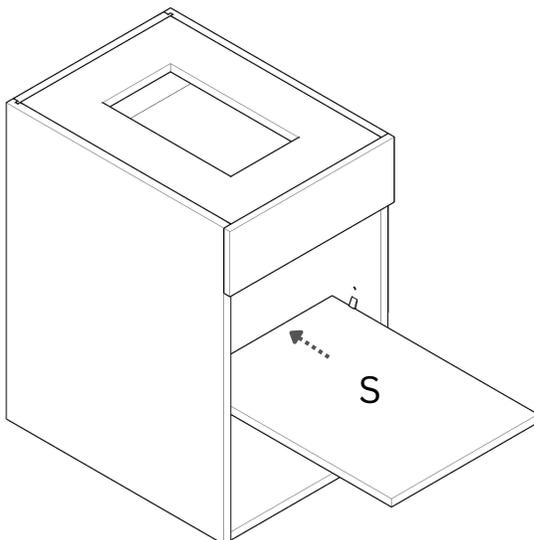

- 1** Insert the plastic shelf clips into the middle holes on the Gables: GL(Left Side Panels).

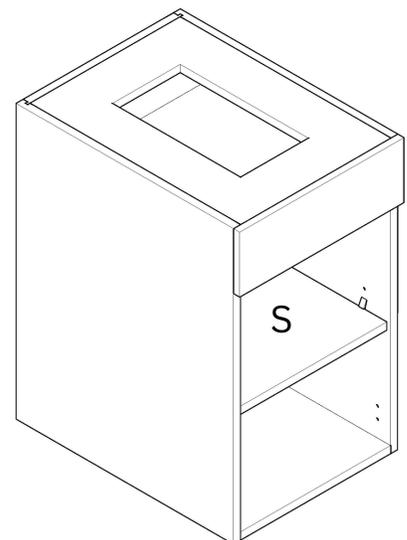

- 2** Insert the plastic shelf clips on other side panel(GL).

- 3** Place the shelf on the four clips, one in the front and one in the back, on each side panel.

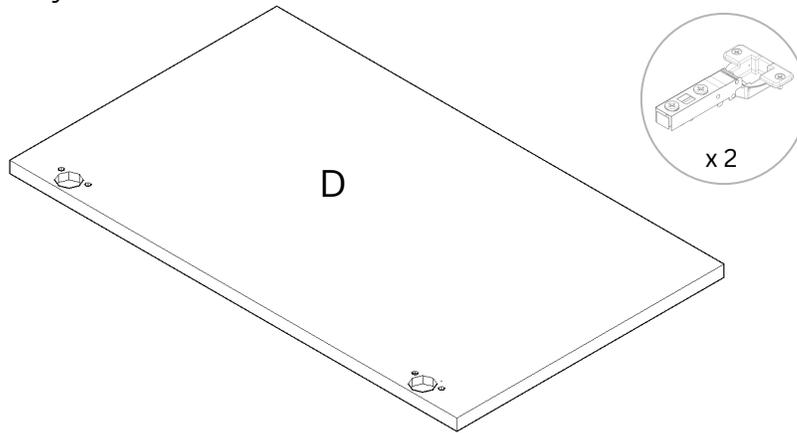

- 4**

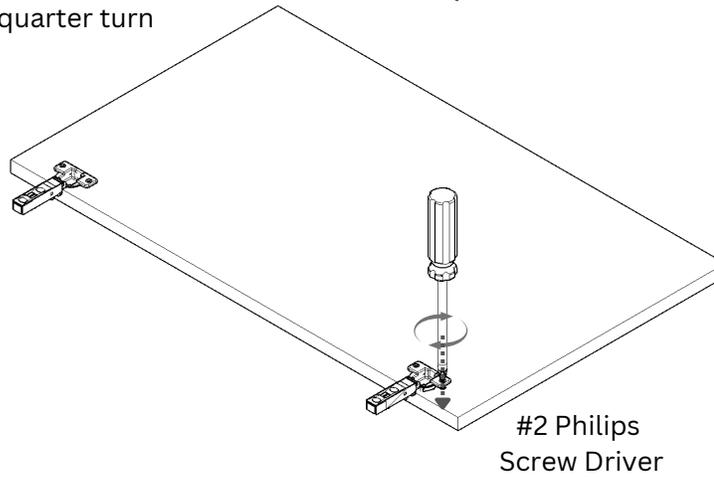

## Step 8

### Installation - Hinges on (Doors)

- 1 Push hinges all the way into the holes.

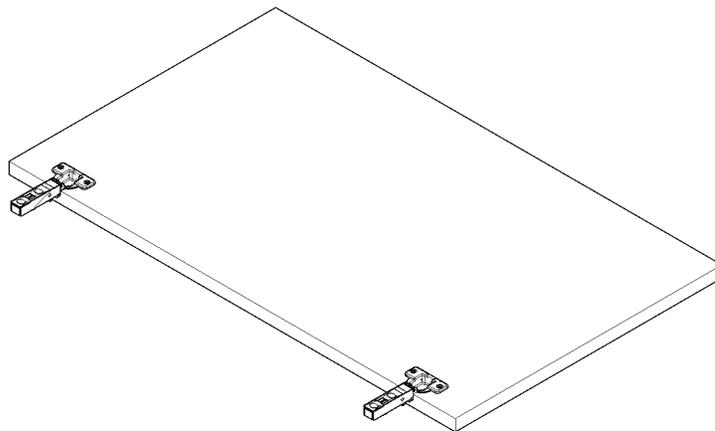

- 2 Tighten screws, a quarter turn to lock it in place

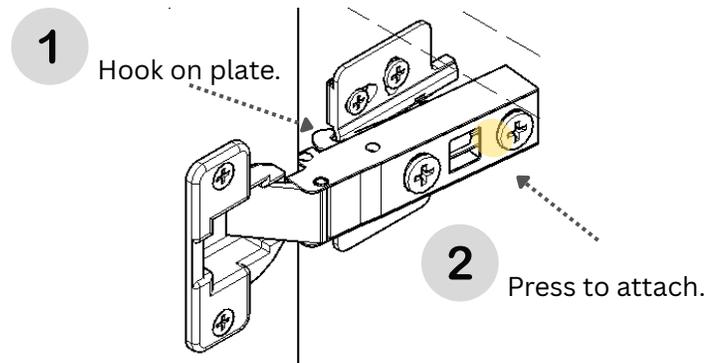

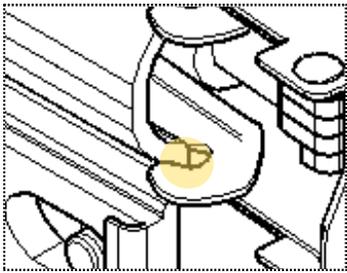

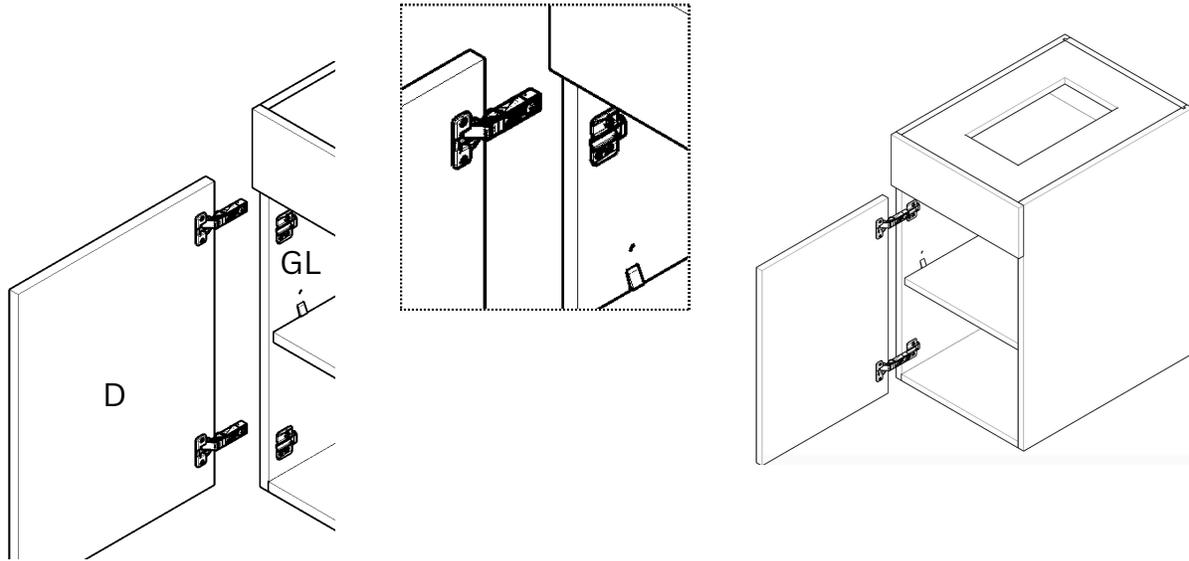

#### To achieve:

To seamlessly attach two hinge plates to the door panel.

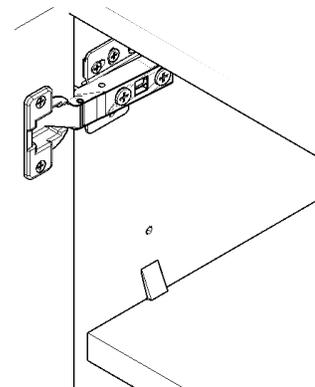

## Step 9

### Installation - Doors

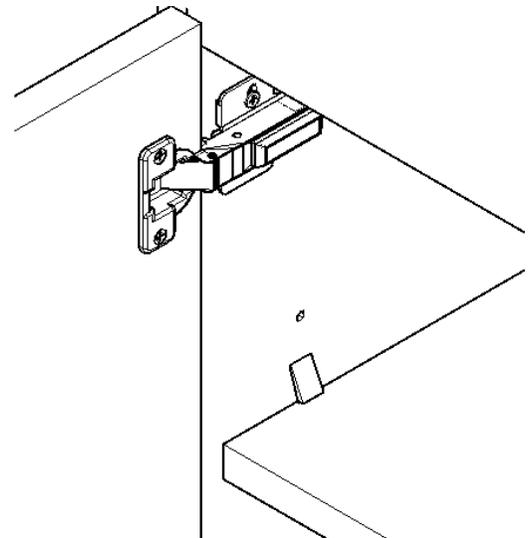

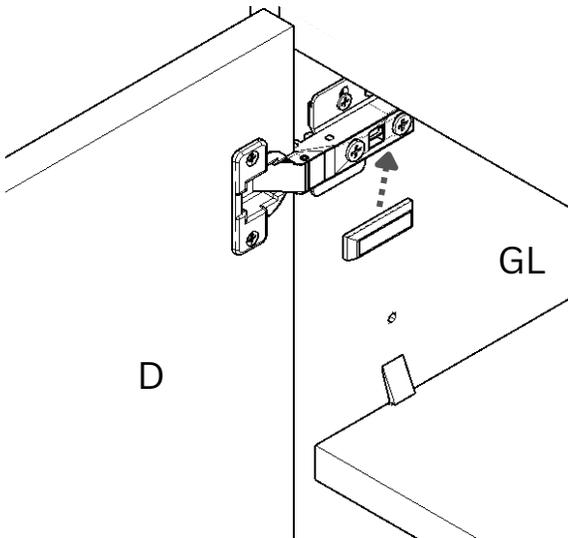

**3** A 'SNAP' sound is the confirmation of a successful installation.

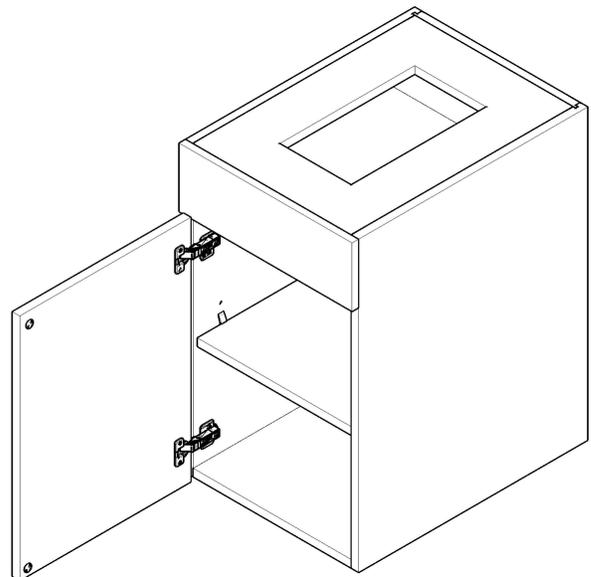

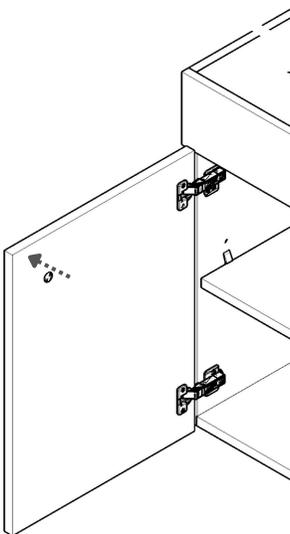

## Step 10

### Installation - Accessories

- 1 Snap the hinge cover onto the hinge.

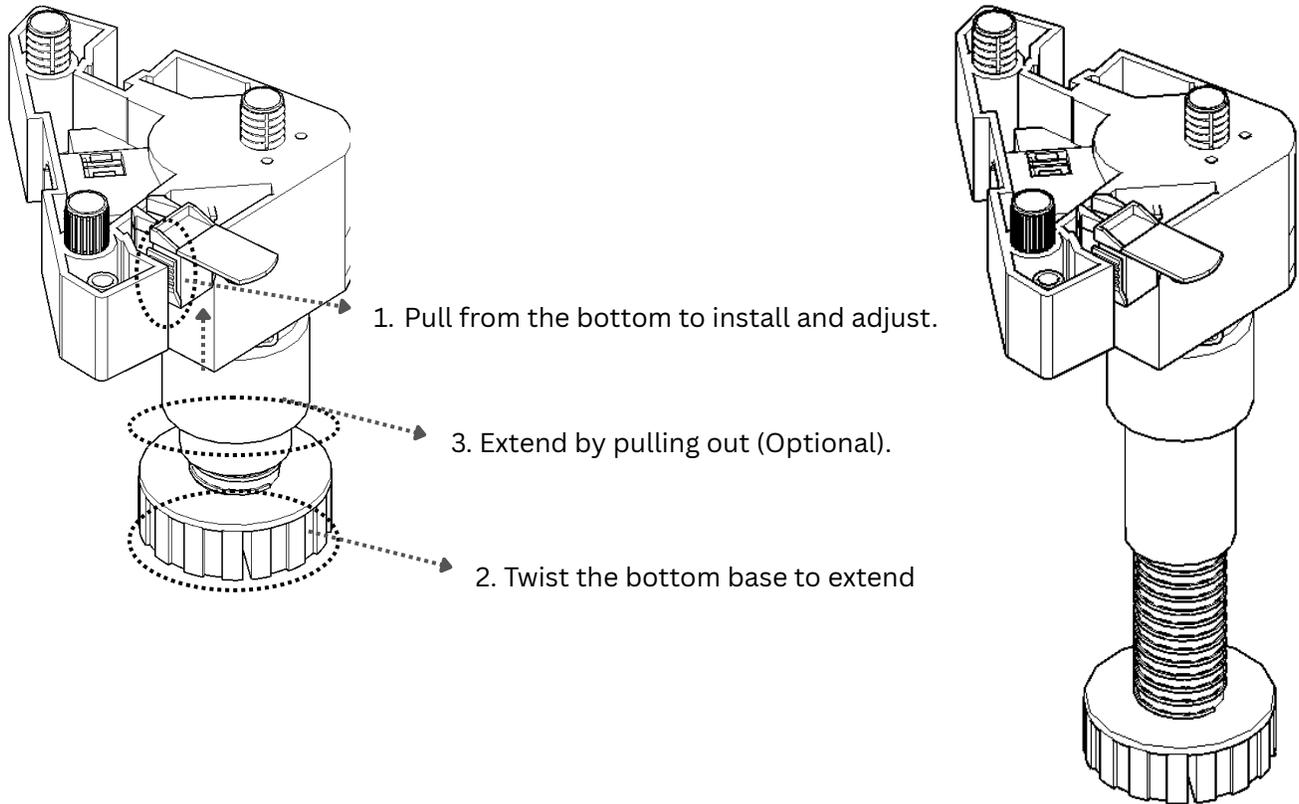

- 2 Stick the two bumpers to the inside corners of the door.

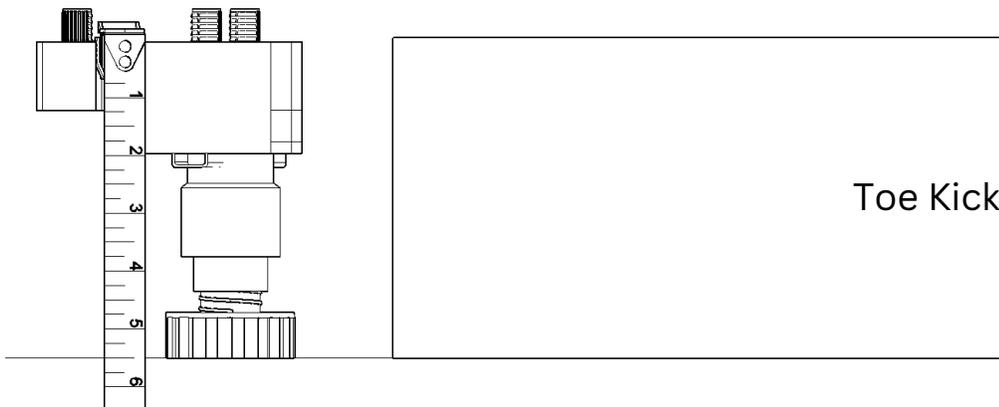

## Step 11

Pre-set the height of the pressure clips

1

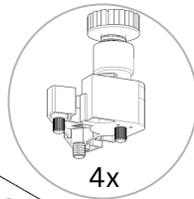

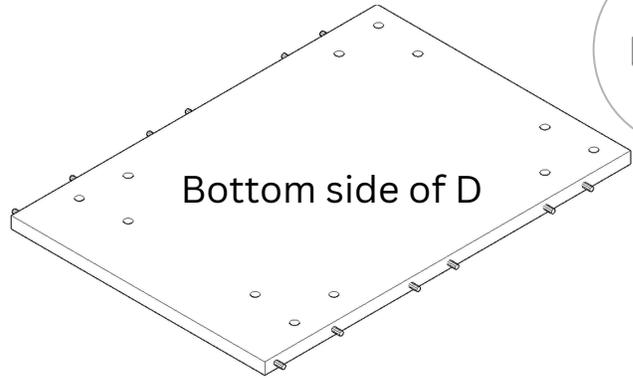

### Toe Kick Height: 5.5" (Default)

To set your leveler to this height for the toe kick to fit.

## Step 12

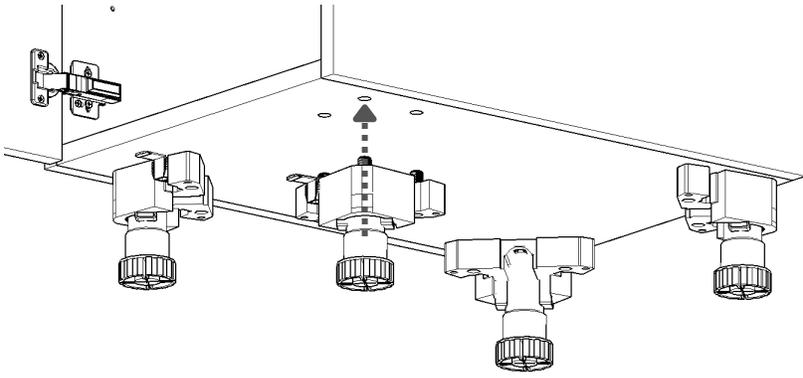

### Installation - Cabinet Leg (Leveler)

1

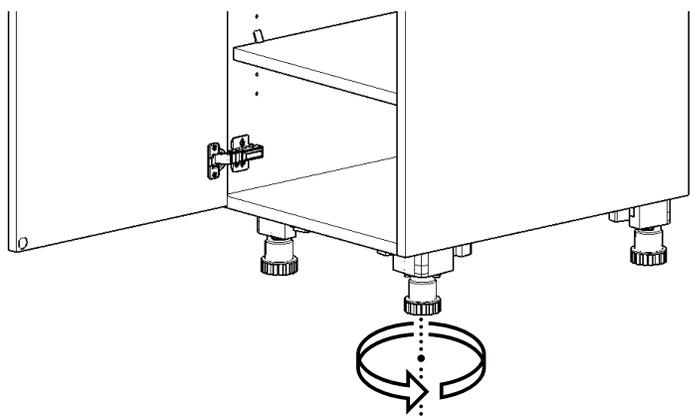

2

Press each leveler firmly into the holes.

3

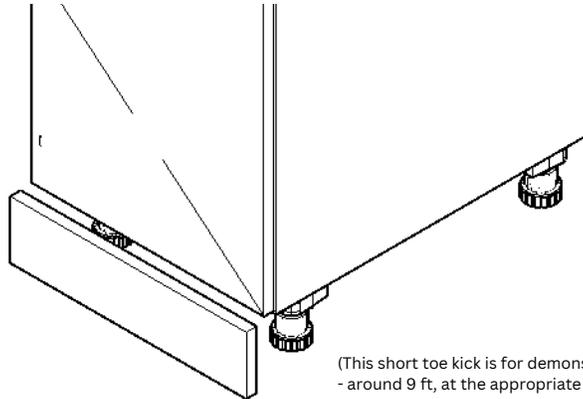

Adjust the three-stage levelers between 90mm and 140mm to the 190mm height setting until the cabinet is firm and level.

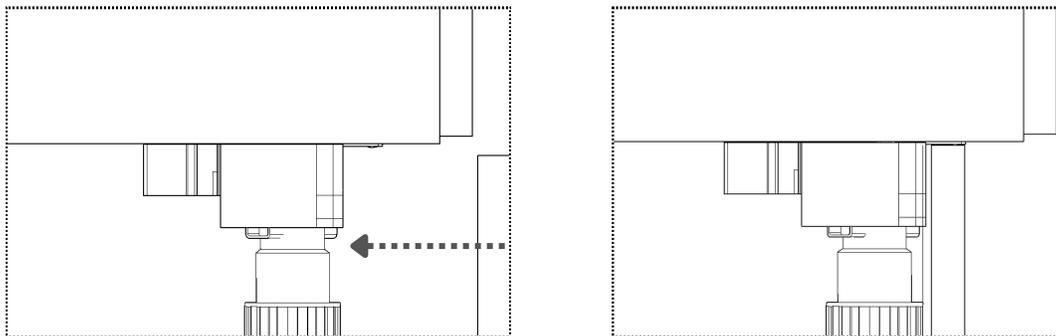

## Step 13

### Installation - Toe Kicks

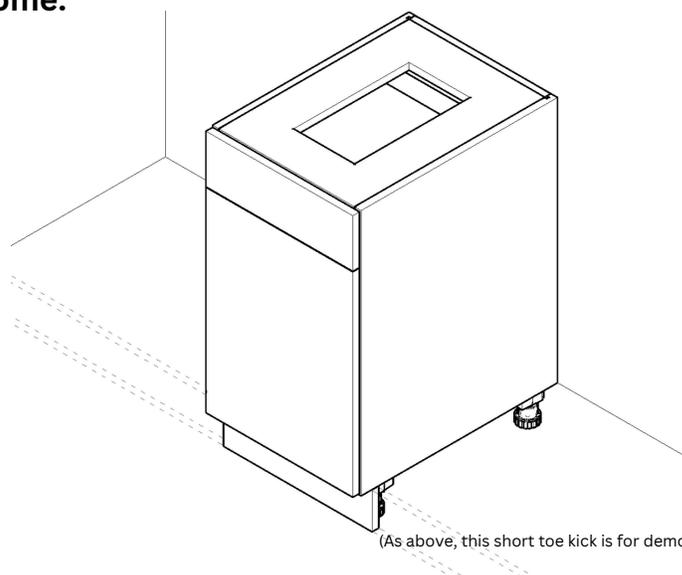

Secure the front toe kick by placing it under the pre-set pressure clip.

(This short toe kick is for demonstration purposes only. The full-length toe kick - around 9 ft, at the appropriate height - will be shipped to your address.)

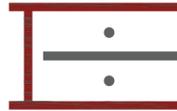

### Installation Outcome:

(As above, this short toe kick is for demonstration purposes only.)

This guide is for single cabinets only. For kitchen installations, please refer to our online instructions.
